

D. TIPS & TECHNIQUES

Special applications often require special techniques and, inevitably, many “special” techniques find their way into standard practice. The following section is presented to provide you with practical options for a variety of special applications and considerations that may apply to your PolySteel project in addition to a number of products and services that we recommend to help make it as successful as possible. We suggest that you review this section prior to getting started with your project in the hope that you may find thousands of dollars of savings in time and materials in the following pages.

- D.1. TERMITES AND TREATMENT
- D.2. SETTING POLYSTEEL FORMS IN WET FOOTINGS
- D.3. SHALLOW FROST-PROTECTED FOOTINGS
- D.4. CAROLINA CLIPPER
- D.5. CUTTING SPECIAL ANGLES
- D.6. CUTTING FORMS FOR CURVED WALLS
- D.7. CRAWL SPACE VENT
- D.8. CONTINUOUS STIRRUPS FOR LINTELS
- D.9. GABLE END WALLS
- D.10. TRANSITIONS FROM ONE SIZE FORM TO ANOTHER
- D.11. PANELIZING POLYSTEEL WALL SECTIONS
- D.12. BRICK LEDGES
- D.13. CONCRETE MIX DESIGNS
- D.14. CONCRETE SLUMP TEST
- D.15. SIZING HVAC EQUIPMENT
